

ISEED Innovation Targets

- ▶ Taking “citizen science” initiatives, in all their diversity, as a “**methodological toolbox**” to improve participation and deliberation in democracy
- ▶ Taking the role of science-based knowledge in public policy and democratic decision-making (central to knowledge societies) as a means to **improve participatory and deliberative processes** as a complement to representative democracy

ISEED Aims

- ▶ Identify conditions when **active participation of citizens in public debate and knowledge production** contributes to sound and legitimate decision making in democratic societies (across the divide between producers and users of that knowledge, and between expert and lay contributions to knowledge growth)
- ▶ Envisage new opportunities for active participation that empower citizens by **reducing unequal access to information and increasing accountability and social inclusion**
- ▶ Build a scenario wherein Europe, and European institutions, can be at the forefront of discussion on how to engage in fair, cooperative and competent political action on the basis of an **effective use of a well-functioning public sphere.**

Inclusive Science and European Democracies

The Project

Title: Inclusive Science and European Democracies

Acronym: ISEED

Grant Agreement: 960366

Scheme: H2020 RIA

Call: SU-GOVERNANCE-21-2020: Developing deliberative and participatory democracies through experimentation

Start Date: 1 February 2021

End Date: 31 January 2024

Duration: 36 months

Estimated Project Cost: EUR 2.723.287,00

EU Contribution: EUR 2.723.287,00

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement no.960366.

Consortium

UNIVE	Ca'Foscari University of Venice	Lead Partner	Italy
UNITN	University of Trento		Italy
MNHM	Museum National d'Histoire Naturelle	Paris	France
UNIWAR	University of Warsaw		Poland
NTNU	Norwegian University of Science and Technology		Norway
IRMIR	Institute of Urban and Regional Development	Warsaw	Poland
DBT	Danish Board of Technology		Denmark
UCD	University College Dublin		Ireland
UPF	Pompeu Fabra University	Barcelona	Spain
ARC	ARC Research Fund	Sofia	Bulgaria
MEC	Ministry of Education of Uruguay		Uruguay
UNEXE	University of Exeter		United Kingdom

The Challenge

How to achieve broader and knowledge-based participation in public debate and deliberation in Europe and beyond. ISEED explores ways to ensure that democratic governance is based on and driven by reliable knowledge (in particular science-based), while responding to the diversity and plurality of voices that democratic participation is meant to ensure.
